

Industry Innovations

RCH Pre-Construction Newsletter

As you may know there are a lot of crazy things going on in our industry. We here at RCH aren't *phased* by it at all, mostly because of all the amazing innovations happening now! The RCH Pre-Con Team has reviewed many different products to find the best and coolest things to share with our clients.

Nevin's Picks

This month Nevin took a look at some electronics upgrades from *Mockett*. They are a company that specialized in "Fine architectural hardware for your fine furniture." These innovations are making life so much more convenient. It will make your home modern and savvy.

Mockett Dual-Sided Kitchen Power: "The perfect low profile addition to your kitchen counter top! Power within reach that pops up when you need it and presses down into the surface when you don't for a clean and stylish look."

<https://www.mockett.com/power-communication-systems/kitchen-power/pcs103a-ee.html>

Mockett Invisible Wireless Charging: "Experience the convenience of wireless charging on your desktop with a completely seamless integration into your furniture."

<https://www.mockett.com/power-communication-systems/kitchen-power/pcs77a-usb.html>

Pop-up Kitchen Power

Unique Features

HIDDEN CHARGER

Installed under the surface, preserving the aesthetics of the top.

POWERFUL & COMPACT

Wireless charging technology created in a small charger.

LED LIGHT INDICATOR

Passes through an LED light indicator to show the exact charging position.

Under Counter Charger

Jason's Picks

We had a representative from *AMS* come into our office to talk about new siding options. *AMS* represents several manufacture's including *EQUITONE*, *Fundermax*, *dri-design*, and more!

The products range from fiber cement facades to aluminum wall panel systems to compressed craft paper. All their products are through-colored material (meaning that they are colored all the way through the material, so they won't fade). The *Equitone* line is a fiber cement material that doesn't scratch and is zero maintenance. How cool is that! "The *EQUITONE* line is my favorite."

EQUITONE [linea]: "a 3D shaped... fibre cement façade material that plays with light and shadow... Every moment of the day, the changing angle of daylight gives the material a different aspect."

<https://www.equitone.com/en-us/materials-en-us/linea/>

EQUITONE [tectiva]: "characterized by a sanded surface and naturally occurring hues withing the material... strongly expressing the raw texture of the core eternit fibre cement material."

<https://www.equitone.com/en-us/materials-en-us/tectiva/>

EQUITONE [natura]: "subtly display[s] the raw texture of the core eternit fibre cement... [and] comes in a large panel size and can be transformed into any size or shape."

<https://www.equitone.com/en-us/materials-en-us/natura/>

EQUITONE [linea]

Build Methodology

We've talked a lot about the new air infiltration requirements changing in February. This discussion with you our clients, has continued with our architects and designers. One of those architect sent us a solution to all our problems. "We connect our patented technology to your home via a modified blower to pressurize and distribute the sealing formula. The pressure carries our non-toxic, water-based formula throughout the home and effectively seals any leak by using the very air that is leaking out of the home, thereby finding any leak point; visible or not. Have peace of mind monitoring the seal and seeing real-time result. You'll even get a certificate of completion showing the before and after results."

Check this out: <https://aeroseal.com/aerobarrier/how-aerobarrier-works/>

Seal The Gap

Our air sealing system seals all building envelope leaks up to 1/2", and as small as a human hair.

Waterborne Acrylic Seal

GreenGuard Gold certified, the sealant is self-guided to the edges of leaks creating a seal.

Real-Time Updates

Using a standard, single-point blower door test, our software measures the leakage in real time.

Meet Requirements

Real-time measurements enable you to dial in specific requirements and guarantee the results.

Stay tuned for more!
